OUR TEAM

AT CCM, HOCKEY IS OUR RELIGION.

We provide the best tools to true believers, like you; to enhance your potential, your performance within. High performance product that is built from the inside out, built to be a part of you; allowing your instincts to explode on the ice. It's you, only better.

CCM IS HOCKEY & ONLY HOCKEY.

RUNNER LENGTH

Fits CCM and Reebok E-Pro holders.

A lighter blade raises the center of gravity, optimizing the balance of the skate, making it easier to maneuver. The same precision stainless steel feel that pro players demand, simply 33% lighter than any other CCM blade.

U+ SKATE OVEN

ACUPLU

WEIGHT

At a true 415 grams, this super light stick offers more feel, better balance, quicker reaction time, faster swing speed and ultimately, super fast shots resulting in more goals.

SHAFT

The U+ CL stick combines a 360° inter-laced full woven carbon outer wrap with optimized additional carbon layers to provide improved strength, thus providing the best durability a stick in this performance category can have.

TAPER

This true one piece stick, with a 24" uninterrupted and consistent taper, will transfer all energy from your hands directly to the blade and allow for maximum stick load to help release harder and faster shots.

BLADE

Multiple layers of 100% thin lightweight high grade pre-preg carbon, placed at different angles, will provide a CRAZY light blade with great feel, performance and durability.

U+
**Octo
Light**

SHAFT

Made of high strength carbon with nano particles for increased toughness and more durability, the first 36" of the shaft features a Traditional 'T' geometry.

TAPER

The lower part of the stick features a 24" 8-sided Octo Gun power taper. This shape allows for improved vertical stiffness, thus resulting in a faster shot, as well as better accuracy and more stability.

LIGHT WEIGHT

The 8-sided power taper also eliminates mass for a lighter weight stick with better balance and more feel. This new U+ Octo Light is now in the super light category with a true weight of 450 grams.

LOW KICK POINT

The 8 sided low kick point connection will deliver a very quick response every single time.

BACKHAND

Designed for stickhandlers, the CCM Vector gloves feature a molded EPP backhand constructed to mimic the natural contours of your hand.

PALM

Leather palm with Nash reinforcement combines breathability with durability.

FINGERS

Die cut EPP foam strategically designed for an adjusted fit. Narrower cut fingers enable hand to close easier around shaft, better facilitating stick control.

DUAL AXIS THUMB

Molded plastic insert split on two angled axis to follow curve of thumb and enable hand to better control stick.

4R

**BACKHAND**

EPP foam die cut to better contour hands while providing the strongest protection. Strategically placed ventilation channels provide maximum airflow to keep gloves both lightweight and dry.

**CUFF ROLL**

Molded cuff roll provides protection while allowing for maximum wrist mobility.

**FINGERS**

The 4RPro is CCM's redesign of a classic construction. The finger construction was re-worked with strategic breaks to allow for better mobility without sacrificing fit, comfort or protection.

**PALM**

All leather palm provides excellent comfort while allowing for better airflow through vented backhand and palm.

U⁺PRO

SHOULDER CAPS

Unique stretch zone construction allows for full arm rotation without compromising protection. The new U+FIT protective gear is built close to the body for a responsive fit that provides the right amount of protection.

CHEST

The sternum is protected with molded EPP only, a lightweight highly impact resistant material. The unique stretch zones link the molded sternum to the redesigned rib protection allowing for an improved snug fit.

PROTECTION

EPP foams and stretch zone constructions combine with a ventilated shell for the ultimate lightweight high performance protection.

ELBOW CAP

Exclusive to CCM, the 3 piece elbow pad features a close molded cap that wraps around the joint to help hold pad in place.
