

STEALTH LAUNCH | FALL 2011

 **EASTON**

# STEALTH RS

We believe the Stealth RS is the ultimate sniper stick, built to give you the confidence to become a finisher on every scoring opportunity.

## SHAFT

Easton compression molds the shaft to allow for a custom made layer of Kevlar® on the outer wrap for protection and dampened feel. This process compacts the laminate to make it a lighter, stronger and better performing shaft that loads and unloads with more force.

## STEALTH RS GRIP

- Elliptical Profile™
- Multi-Rib™ blade construction
- Kevlar® wrapped shaft
- Low kick point
- Pro shaft dimension
- Matte finish blade
- Grip coating

### SENIOR

Flex 100     A187 338  
Flex 85     A187 339  
01 Iginla     08 Heatley  
10 Parise     11 Hall  
15 Getzlaf     19 Cammalleri

### INTERMEDIATE

19 Cammalleri

### JUNIOR

Flex 50     A187 347  
01 Iginla     11 Hall

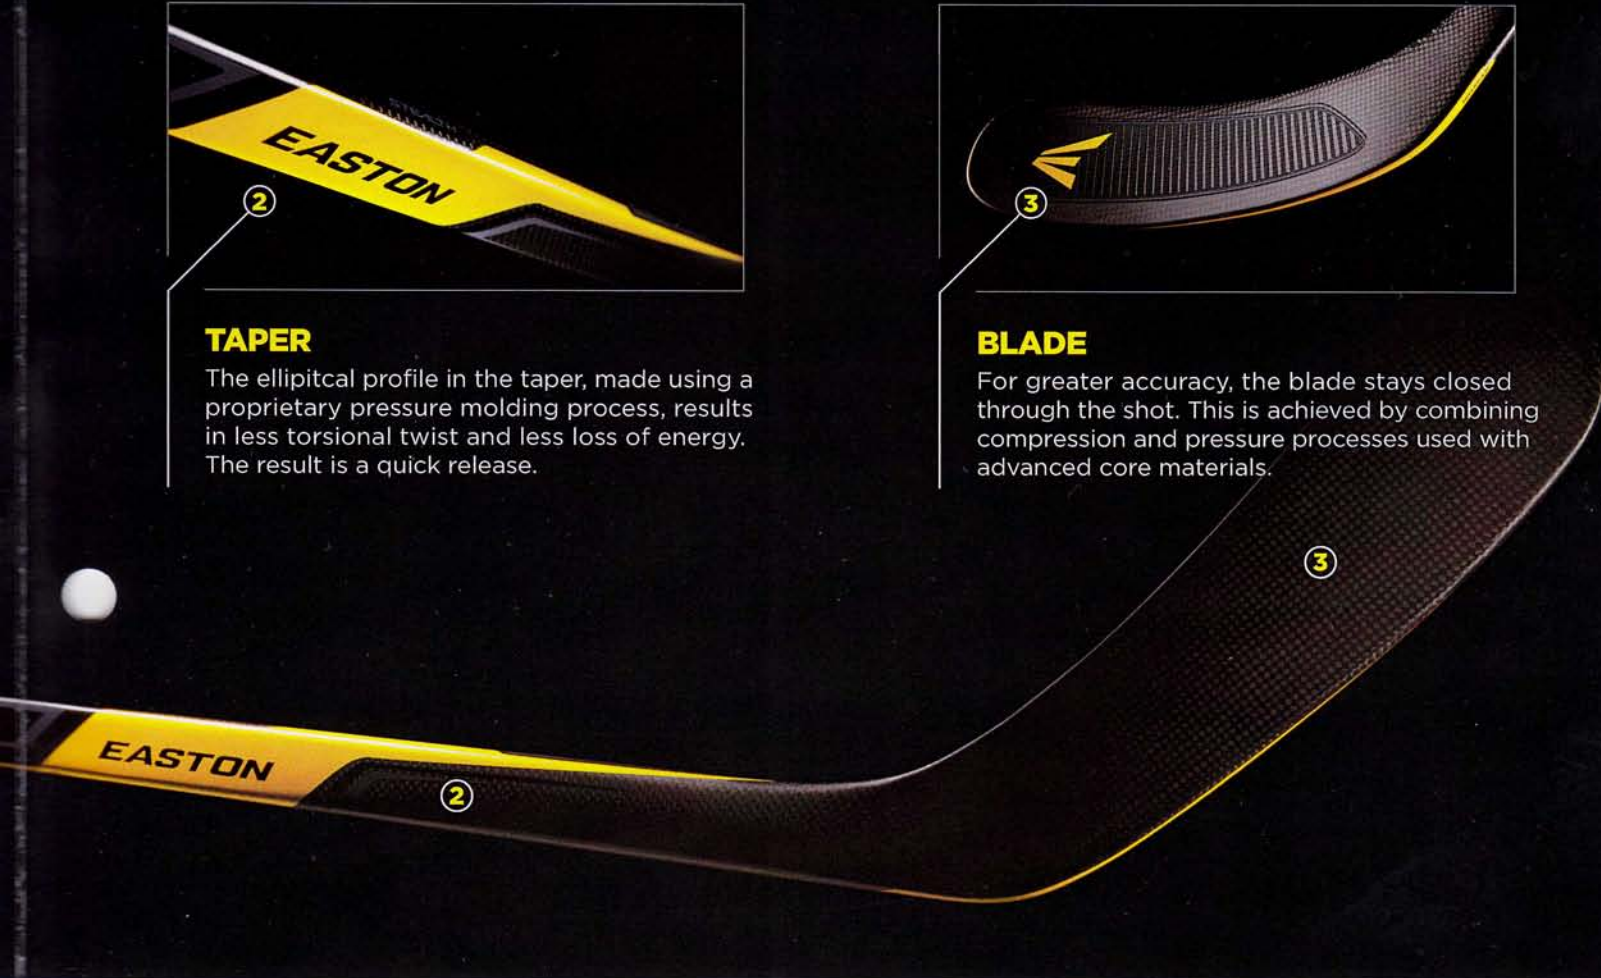

### TAPER

The elliptical profile in the taper, made using a proprietary pressure molding process, results in less torsional twist and less loss of energy. The result is a quick release.

### BLADE

For greater accuracy, the blade stays closed through the shot. This is achieved by combining compression and pressure processes used with advanced core materials.

## STEALTH RS

- Elliptical Profile™
- Multi-Rib™ blade construction
- Kevlar® wrapped shaft
- Low kick point
- Pro shaft dimension
- Matte finish

# STEALTH 65S

The Stealth 65S is the shooter's stick. The shaft, contoured to match pro specs and made with a combination of high grade carbon and Kevlar®, finishes off with an ultra thin taper for a fast and smooth release. Multi-Rib construction keeps the blade closed through the shot for ultimate control and accuracy.

## STEALTH 65S GRIP

- Ultra thin taper profile
- Multi-Rib™ blade construction
- Carbon/Kevlar® shaft construction
- Low kick point
- Pro shaft dimension
- Matte finish blade
- Grip coating
